

QI COIL USAGE TIPS

Here are some great tips for making it easier to use your Qi Coils

We have linked our suggestions to Amazon but feel free to purchase them anywhere!

- **Do not hold the coil to pull out the cord. This loosens the coil from its handle. Hold the handle when you pull out the cord.**
- Protect your Qi Coils when traveling by putting each one in a [thick sock](#) so that they are protected.
- Purchase 2 or 3 foot [audio cables](#) for use on your desk without a lot of extra cable clutter.
- Purchase [Velcro Strips](#) to connect your Qi Coils to one another. Use two so that they stay in place.
- Purchase [Anti Slip Gel Pads](#) so that your Mobile Power Kit doesn't slip off the table. The weight of the cables can knock the Power Kit off the table.
- Purchase [Mic Stands](#) to hold your Qi Coils in place. This is great for sleeping. Buy [longer cables](#) for this.
- Purchase [Case](#) for Samsung Galaxy Tab A8
- Purchase a [Splitter](#) if your tablet or phone doesn't have an audio input.
- To differentiate between the coils, put a ½ inch colored [dot sticker](#) or fingernail polish on one to know which is yin and which is yang.
