OBSERVATIONAL STUDY USING QI COIL FREQUENCIES

Title: Clinical Study using Qi Coil Frequencies of 25 patients over a 7 month period

Objective: To observe and analyze varying levels of Qi Coil frequencies in 25 patients for treating various patients with mental, physical and spiritual ailments over a 7 month period.

Method:

- A sample group of 25 adults aged 35-85 years old, varying male and female participants of diverse ethnic and racial backgrounds.
- Participants in the study consented to self reporting.
- The Qi Coil treatment consists of a yang-ying Qi Coil, with an amplifier
- Participants are not assigned to any physical activity regimen. Instead, researchers collect data on each participant's
- Participants reported where they started, what their symptoms were at the pre-beginning of treatment and values obtained at the end of treatment.
- RIFE frequencies were used for the various psychological, physical and spiritual problem areas.
- Researchers also record participants' symptoms of 25 different areas from depression, vertigo and more at the beginning and end of the 7 month period
- The participants were not measured for any confounding variables during the study

Data Analysis: RIFE Frequencies were used for the following, a total of 25 participants were measured for the following clinical metrics:

1. Vertigo
2. Depression
3. Anxiety
4. Hearing Loss
5. Autism
6. Nausea
7. Negativity
8. FLU
9. Eczema
10. Tooth Decay
11. Psoriasis
12. GERD
13. High Cholesterol
14. Lyme Disease
15. Stomach Acidity
16. Enlarged lymph-nodes
17. Fatigue
18. Cysts
19. Skin Cancer

20. Muscle Pain
21. Diabetes
22. Bad luck
23. Incontinence
24. Toothache
25. Ear-ache

Results: Patients that were on a plant based diet and a detox regimen had a positive advantage and outcome, as their cure rate of the 25 symptoms were diminished. Additionally, those who had a traumatic childhood and poor attachment problems had a deficient/slower cure rate. For the following participants with specific symptoms had the following outcomes listed below:

1. Vertigo participant at first could not get out of bed because everything was spinning. Using the Qi Coil on the first day, after the onset of those symptoms, the participant received some relief after 1 day. The 2nd day, there was no spinning observed, no nausea, and a certain amount of unsteadiness when she was walking. The 3rd day there was much less vertigo, less dizziness, no nausea, minor imbalance was noted. The 4th day, she jumped out of bed, walked into the kitchen and realized the majority of her symptoms were alleviated. The amount of time the RIFE frequency used per day was for approximately one hour.
2. Depression participant had used the Qi Coil for 1.5 hours for Day 1 and the depression was relieved.
3. The anxiety participant had used the Qi Coil for 40 minutes on Day 1, Day 2 and Day 3. On Day 4, the participant did not experience any anxiety.
4. The hearing loss participant had used Qi Coil for 1 hour daily, 5 times per week and after 3 months, the hearing loss had improved, but there was still a minor amount of hearing obstruction noted.
5. The autism participant (ASD) had used Qi Coil for 1 hour daily, 7 times per week and after 3 months, the participant had a reduced amount of melt downs, and needed to control everything in the environment.
6. The nausea participant had used Qi Coil for 1 hour daily, 4 times per week, and after 1 month, the participant had total elimination of nausea symptoms.
7. The negativity participant had used the Qi Coil for 30 min daily, 5 times per week, and was able to change her mood to being more optimistic and positive.
8. The flu participant had used the Qi Coil for 30 min daily, 4 times per week and was able to greatly decrease the flu symptoms such as mucus buildup, fever and coughing.
9. The eczema participant had the used Qi Coil along with the Liver frequency, 1 hour day for six days and was able to completely clear the eczema.
10. The tooth decay had used the Qi Coil, 30 min per day for 2 months, and during their next dental visit, it was observed that there was no plaque buildup and that their inflamed gums were eliminated.
11. The psoriasis frequencies along with the EBV (epstein barr virus) frequencies were used for the participants for 1 hour 7 days a week, after 2 months there was a 75 percent improvement in the inflammation of the affected skin areas.

12. The gastroesophageal reflux, liver frequencies and intestinal frequencies were used for 1 hour 7 days a week for 2 months, and an 80 percent improvement was recorded.
13. The high cholesterol and blood frequencies were used in dietary improvements to lower the high cholesterol levels for participants for a period of 5 days a week for 3 months.
14. The lyme disease and EBV frequencies were used for the participants for 7 days per week for 3 months with a 75 percent improvement in the symptoms.
15. Stomach acidity and liver frequency, 45 min a day for 7 days a week for 2 months.
16. Swollen lymph-nodes and inflammation frequencies were used 30 min per day for 5 days per week for 8 weeks, and the participants observed reduced swelling of lymph nodes.
17. The fatigue frequency and EBV frequencies and liver frequencies were each used 30 min per day, 5 days per week, for 1 month and resulted in greatly improved energy levels.
18. The cysts participants had the Qi Coil placed on the right hand, for 30 min per day, 7 days per week, for 9 days. By the 9th day, the large cyst that was the size of a marble, was eliminated.
19. Skin cancer participants were given with great caution on skin cancer sites. The Qi Coil was used for 3 months, 3 times per week for 30 min per day. The skin cancer growth began to disappear, and decrease in size. It should be noted that great care has to be taken with frequencies and EM energies, which can stimulate more cancer cells.
20. Muscle pain participants were given on the right shoulder directly on site, for 30 min per day, for 3 days. After 3 days, there was no record of pain associated with the right shoulder.
21. Diabetes participants had used a combination of change in diet to a plant based regimen and diabetes frequency, this ailment was eliminated and dietary changes must be maintained.
22. Bad luck participants, in conjunction with energy psychology, in which the participants were instructed on how to change thought patterns and the frequency for creating a positive future, by raising one's frequency, the person's bad luck turned into fruitful occurrences.
23. In -continence frequencies for participants, was used to decrease the number of bathroom visits and to eliminate the adult diapers. By using the incontinence frequency for 7 days per week for 2 months.
24. Toothache participants, the tooth and mouth frequencies were used to clear up the inflammation, using it 30 min per day for 1 week.
25. Earache participants used the earache frequency and inflammation frequency for 1 hour per day for 3 days and saw measurable improvements.

Conclusion: The study identifies trends and relationships that by establishing a consistent regiment of Qi Coil frequencies, many of the symptomatic patients with a variety of ailments, had seen significant improvement or elimination of harmful symptoms. Overall, participants tend to have better heart health indicators when a holistic approach is used with energy psychology, which changes the way they think about things, a change to a plant-based diet, with regular detoxing; and a therapeutic healing past trauma, neglect and post-traumatic symptomatology.
